

change again. In the meantime, I'll just keep getting vaxxed and boosted, steer clear of high-risk exposures, and shop on the Internet. Something has definitely changed about change!

Some old pennies ARE valuable

No...these are NOT my pennies! ☹️

Aaron's Answers *continued from page 1*

As centuries went on, many new kinds of eyewear were invented and made by various people. One such invention was the invention of the bifocals by Benjamin Franklin. Bifocals can correct myopia, hyperopia, presbyopia, and astigmatism. With two different focals, or lenses, bifocals can fix those conditions, even multiple at the same time. Since then, the only developments in eyewear have been more efficient production, and the invention of trifocals and progressive lenses.

KEEP IN TOUCH WITH THE BOWFIN INQUIRER ON THE INTERNET:

BOWFININQUIRER.COM

Back issues (to March, 2020) and occasional announcements not included in the paper.

In a not-too-distant future month, as Covid subsides, look for an announcement of a contest for Bowfin's Kids – with cash prizes (Like back in the 'good old days') – and a block party.

SCRIMMAGES

by Jerry Lerman (344)

In the January, 2022, issue I included some 'sight gags' I'd created. Since then, I've decided to name them 'Scrimmages' – as in 'screwball images'. Here are a couple more I've created in recent weeks.
